

Adaptive Regelsysteme GmbH (ADRESYS) is a subsidiary of OMICRON electronics GmbH. OMICRON, with over 1300 employees, develops and distributes testing, diagnostic and monitoring solutions. ADRESYS supports OMICRON in research and development, in addition to developing and marketing its own products. To expand the embedded software team at our Salzburg location (Oberndorferstraße 35/C, Austria), we are looking for a:

Software Developer 80-100% (f/m/x)

Focus on Embedded Test Automation

Option for Embedded Software Development

What is it all about?

- You will be involved in product development from the very beginning: design, implementation and maintenance of tests and test infrastructure are among your tasks
- You will implement and improve automated tests and create the requirements for them
- You develop Linux-based software for our test systems
- You develop embedded applications in C/C++

What skills do you need to have?

- You have successfully completed an education in computer science or electrical engineering (university, university of applied sciences, technical college) and have some relevant professional experience
- You like programming, have experience in Python or C/C++ and are used to working with Linux
- You describe yourself as structured and conscientious and appreciate working autonomously
- You are interested in complex technical systems, have an eye for details and like to think "out of the box"
- You have a good command of English

What makes us special?

- **Work flexibly & with balance:** Shape your day to fit your life – whether that's short Fridays, working from home, or taking breaks at the free gym
- **Team culture instead of hierarchy:** Coaches support self-responsibility, creativity, and give you the space to truly implement your ideas
- **Top working environment:** Modern, ergonomic equipment, powerful technology, and a stunning view of Salzburg
- **Enjoyment made easy:** Fresh lunches delivered daily – varied, tailored to your diet, convenient, and subsidized by your employer
- **A strong start guaranteed:** A trial day in advance and a well-thought-out onboarding process provide orientation, security, and an ideal entry into the team

If that sounds like a task that is designed for you – then apply via www.omicron.jobs
